191 million

SAP SuccessFactors solution users

Our easy-to-use software helps teams work together

200+

Countries and territories

SAP SuccessFactors solutions are trusted by companies around the world.

Key Features of the Rydoo x SuccessFactors integration

- **Compatibility** : Perfect for clients who use SAP, SAP successfactors and SAP cloud integration suite.

- **Easy to integrate with Rydoo**: The connector is set up by the clients on their end, and Rydoo sends them a package to import to SAP cloud Integration Suite (iPaaS), along with an installation and configuration guide.

- **Easy to use cloud-based HR solution**: everything clients need for the whole employee lifecycle from recruiting, core HR, payroll and development.

- **Actionable Insights**: Provides key workforce insights to make data-driven and strategic decisions.

- **Support**: We make sure to always let you know if an error is occurring by sending email alerts, and help you handle it.

How it works

Expense management can be considered as part of payroll for some companies, so with the Rydoo x SuccessFactors integration, built by our partner Delaware, you can easily import the following artifacts to your Cloud Integration suite:

Integration flows:

- Employees' data from SuccessFactors to Rydoo
- Assignment of cost centers
- Assignment of Supervisors

Value mapping artifact:

- VM - UserData - SF to Rydoo mapping

This integration connects your SuccessFactors account with Rydoo via sFTP, so whenever you create or update user information on SuccessFactors, the information is automatically synchronised on your Rydoo account by the frequency chosen.

Stop having to do the same thing twice, and keep all employees' data up-to-date on Rydoo without the manual hassle !

For more information about installing and configuring the SuccessFactors – Rydoo Connector, please visit this [page](#).

1M+ professionals are using Rydoo across 85 countries
